BACKGROUND:

Requests for qualifications were mailed to interested Structural, Electrical and Mechanical Engineer providers in the form of a Statement of Qualifications (SOQ) No. 602744-12. In response to these requests, 13 firms submitted written qualifications for the Structural Engineering service; 10 firms submitted written qualifications for Electrical Engineering service, and 10 firms submitted written qualifications for the Mechanical Engineering service; to be considered as professional service providers for the County projects commencing from March 5, 2013 through December 31, 2015 or until new lists are approved, that require Structural, Electrical and Mechanical Engineers services.

The firms specified on the attached Structural, Electrical and Mechanical Engineer Service Providers Lists responded to the Statement of Qualifications, and are considered qualified by an evaluation committee. If approved, the service categories will be used as the firms are listed, on a rotating basis as projects are identified. Since all of the firms were considered qualified by the committee, the rankings within each category reflect the quality of the proposals. In the event that an acceptable contract cannot be negotiated with a service provider, staff will negotiate with the next service provider. All negotiated contracts over \$50,000 will be presented to the Board of County Commissioners for final approval.

In accordance with NRS 332.115.1(b), the competitive bidding process is not required as the services to be performed are professional in nature.
